

29.-30. 9. 2025 | PRAGUE | HOTEL DIPLOMAT

STATE OF THE ART
IN GYNECOLOGIC ONCOLOGY

2
DAYS

Diagnostics
Live scanning
Systemic treatment
Surgical treatment
Perioperative care
Palliative care

www.sago-conference.eu

Dear colleagues,

We warmly invite you to Prague to attend a **State-of-the-Art Congress in Gynecologic Oncology**, a two-day intensive event featuring:

- **Diagnostics, Surgical treatment, Systemic treatment, Perioperative and Palliative care** – presented in four dedicated sections.
- **Current standards in clinical practice** – providing the latest evidence-based approaches.
- **Insights into emerging areas** – including molecular classification, mechanisms of action of new drugs, and next-generation sequencing.
- **LIVE demonstrations** – of ultrasound examinations in patients with ovarian and cervical cancer.
- **VIDEO sessions** – with step-by-step guidance on key surgical procedures.

The meeting is designed for all specialists involved in the care of patients with gynecological malignancies.

We look forward to welcoming you to Prague!

David Cibula

PRELIMINARY FACULTY

Sona Balogova (Slovakia)

Pawel Blecharz (Poland)

David Cibula (Czech Republic)

Martin Dolezel (Czech Republic)

Pavel Dunder (Czech Republic)

Daniela Fischerova (Czech Republic)

Filip Frühauf (Czech Republic)

Jitka Fucikova (Czech Republic)

Michael Halaska (Czech Republic)

Roman Kocian (Czech Republic)

Ludmila Krizova (Czech Republic)

Lukas Lambert (Czech Republic)

Radoslaw Madry (Poland)

Sara Nasser (Italy/Germany)

Zoltan Novak (Hungary)

Maja Pakiz (Slovenia)

Jiri Presl (Czech Republic)

Mikulas Redecha (Slovakia)

Katerina Rusinova (Czech Republic)

Ales Ryska (Czech Republic)

Jiri Slama (Czech Republic)

Radek Spisek (Czech Republic)

Maciej Stukan (Poland)

Gabor Szabo (Hungary)

Toon van Gorp (Belgium)

Natalya Volodko (Ukraine)

Vit Weinberger (Czech Republic)

Michal Zikan (Czech Republic)

SAGO 2025 PRELIMINARY PROGRAM

DIAGNOSTICS AND STAGING

- Rational use of imaging methods in gynaecological oncology
- Preoperative staging of pelvic masses
- Assessment of lymph nodes by US, PET and MRI
- Pelvic side wall anatomy and assessment
- Imaging guided procedures

LIVE ULTRASOUND SCANNING

LIVE demonstration of ultrasound examination of patients with gynecological tumors.

SYSTEMIC TREATMENT

• Systemic treatment of ovarian cancer

- What is BRCA, HRD, HRR, and how they are tested
- Biomarkers in ovarian cancer – which and when
- Current SoA chemotherapy
- Maintenance treatment in 1L and beyond

• Platinum resistant recurrent ovarian cancer

- Current SoA treatment of PROC
- What is ADC and how it works
- Predictive biomarkers and their testing
- First ADC approved in ovarian cancer in Europe
- Challenging management of new types of toxicity

• Management of locally advanced and metastatic cervical cancer

- Chaos in classification (intermediate/ high risk, IB3, locally advanced disease)
- What is the current standard treatment in locally advanced cervical cancer (chemoradiotherapy vs induction chemo vs immunotherapy)
- First line treatment of metastatic disease
- Tips how to manage toxicity and enhance treatment compliance

SAGO 2025 PRELIMINARY PROGRAM

• Endometrial cancer

- Molecular classification in endometrial cancer for beginners
- Indications of adjuvant treatment in the molecular era
- Systemic treatment of metastatic and recurrent endometrial cancer

• Immunotherapy and endocrine treatment

- A guide to cancer immunotherapy
- Principles of cancer immunotherapy strategies
- Endocrine treatment in gynaecological tumors
- The role of NGS and molecular tumor boards in current management

SURGICAL TREATMENT

• Early stages

- Surgical treatment of non-epithelial and other rare ovarian tumors
- Surgical treatment of early stage cervical cancer in the „after SHAPE“ era
- Sentinel lymph nodes in gynaecological cancers
- Management of patients with micrometastases and isolated tumor cells in SLN

• Fertility sparing treatment

- Fertility preservation in cervical cancer
- Fertility preservation in endometrial cancer
- Management of gynecological tumors in pregnancy

• Advanced stages

- Secondary cytoreduction in ovarian and endometrial cancer
- Pelvic exenterations, LEER and out-of-box procedures

VIDEOSESSION

Demonstration of main radical surgical procedures step by step.

PERIOPERATIVE AND PALLIATIVE CARE

- Implementation of ERAS and prehabilitation into the routine practice
- Early palliative care and best supportive care in gynaecological oncology
- Communicating serious news effectively: Tips and tricks for a person-centred approach

SEE YOU IN PRAGUE
